CloudSoda

Modern Data Management for Unstructured Storage
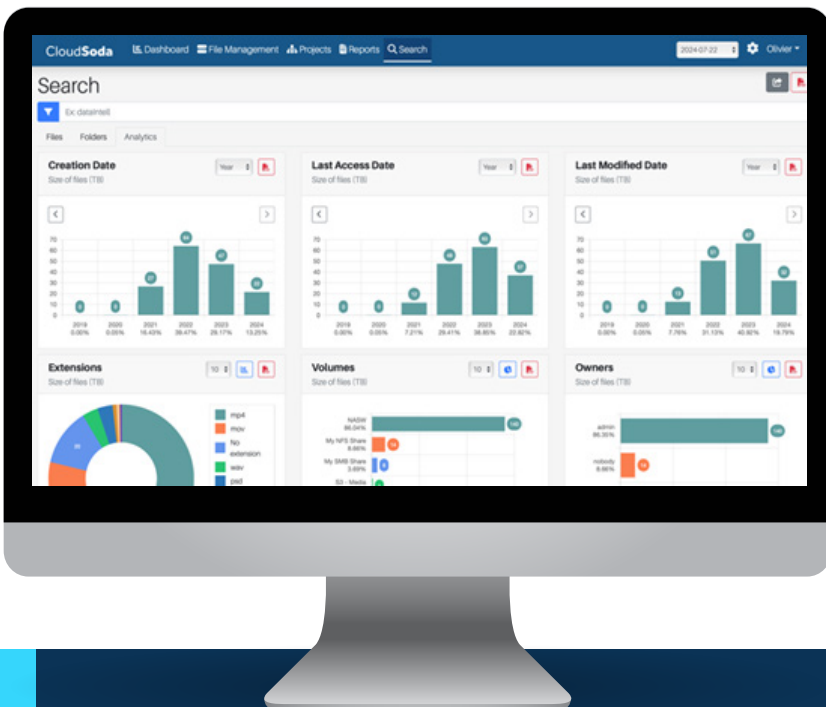

CLOUDSODA SOLITION OVERVIEW

CloudSoda delivers a robust and comprehensive platform for businesses aiming to optimize their unstructured data management in edge, core and cloud environments. CloudSoda's Data Intelligence module provides full visibility and control enabling businesses to act with their data for cost savings, governance, and policy. Additionally, CloudSoda's Data Orchestration capabilities enable seamless anywhere-to-anywhere data movement for collaboration, tiering, repatriation, and migration. The CloudSoda Modern Data Management platform ensures that businesses can manage their data more effectively, driving operational efficiency and strategic agility for AI readiness.

INSIGHTS AND VISIBILITY FOR ALL YOUR DATA

• Storage vendor agnostic (SMB, NFS, S3, GCP, Azure) + Cloud Tier (Deep Glacier, Cold, Coldline) access is included in the CloudSoda Data Management platform. No Plug-Ins required.

CLOUDSODA DASHBOARD
– EASY TO USE INTERFACE AND DRILL DOWN FUNCTIONALITY

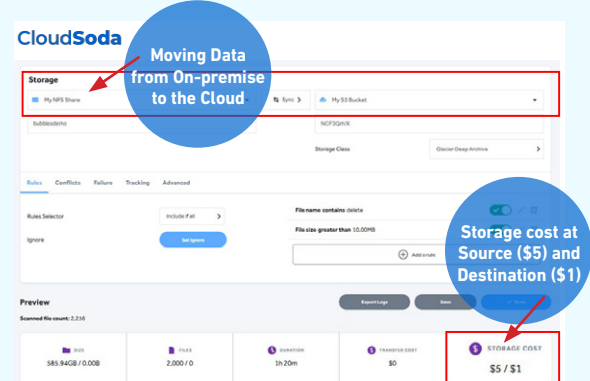

TAKE ACTION WITH CLOUDSODA'S DRY RUN STORAGE COST ANALYTICS
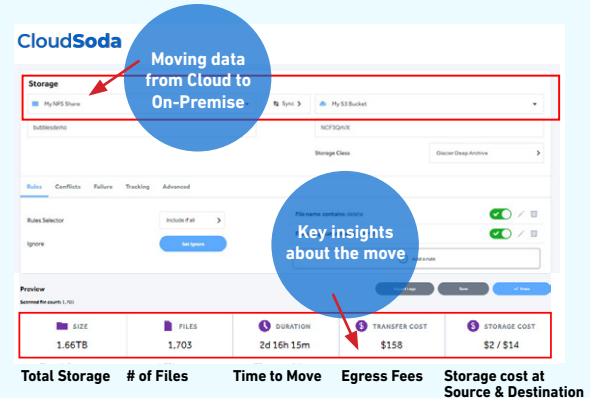

Test different scenarios and storage classes to move into, out of, or between public Cloud Tiers before committing to a particular strategy.

• Understand the storage cost impact at source and target destination, egress costs and estimated time to move to and out of the public cloud providers.

DRY RUN: PLAN YOUR DATA MOVE TO THE CLOUD

DRY RUN: PLAN YOUR DATA MOVE FROM THE CLOUD TO ON-PREMISE

Gain Insights and Cut Costs

VISIBILITY AND ACTION ACROSS ALL YOUR UNSTRUCTURED DATA

- **Access**: Analyze your data

- **Find and Eliminate Duplicate Data**

- **Understand Current Storage Costs**: by storage platform and by storage tier based on your price book.

- **Move your data anywhere in 3 clicks**

  1. Select your cold or duplicate data

  2. Select the files

  3. Choose the archive target and move your data

**It's 3 clicks to move your data... It's that easy... It's that simple**

Storage Utilization for Operational Savings

FOR CAPACITY PLANNING, BUDGETING, CHARGEBACK AND SHOWBACK BY BU, TEAM AND PROJECT

- **Identify Peak Usage by Storage Platform** – view storage trends over time

- **Identify Top Storage users** by Business unit, team and/or project
